

FALCON™

Nectar

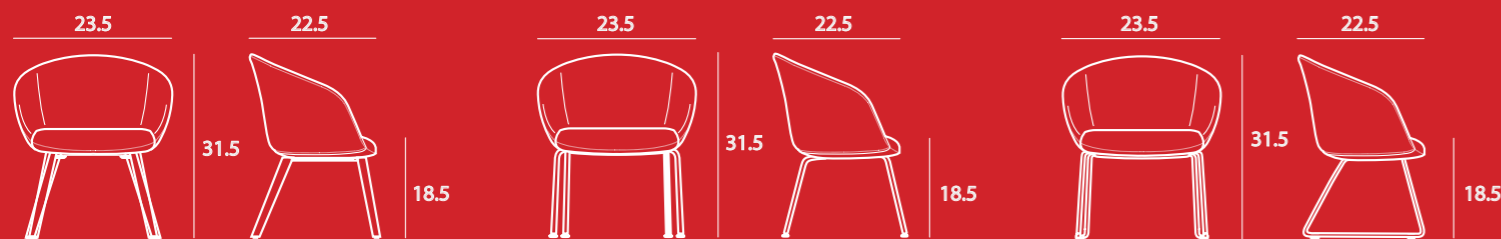

FalconProducts.com

Wow your guests with the comfort of Nectar seating! Built on a wire frame, Nectar flexes and forms itself to the body cradling the occupant in comfort. The chair is versatile enough to use in dining, conference rooms, lobbies or anyplace a lightweight chair is desired.

Nectar utilizes Certi-PUR® foam which contains no formaldehyde, ozone depleters, mercury, lead or other heavy metals.

Nectar is manufactured so the upholstery can be easily replaced. At the end of its life, the entire chair can be broken down for proper recycling. Very few chair designs can do this.
